

# Connect to your Database Server

- Open <http://localhost/phpMyAdmin/> in your browser and go to User Accounts > Add User Account.

# Connect to your Database Server

- Fill out the information as shown below. Create a user name and password. The host name should be “localhost.” You can “Check all” for privileges.
- Leave SSL option to “Require None”
- Press the “Go” button at the bottom right to complete the new user creation. You have just made yourself a superuser on localhost server!

### Add user account

Login Information

User name:

Use text field: ta\_anna

Host name:

Use text field: localhost

Password:

Use text field: .....

Strength: Strong

Re-type:

Use text field: .....

Authentication Plugin

Native MySQL authentication

Generate password:

Generate

Database for user account

☒ Create database with same name and grant all privileges.  
☒ Grant all privileges on wildcard name (username\_%).

Global privileges

Check all

Note: MySQL privilege names are expressed in English.

Data

☒ SELECT  
☒ INSERT  
☒ UPDATE  
☒ DELETE  
☒ FILE

Structure

☒ CREATE  
☒ ALTER  
☒ INDEX  
☒ DROP  
☒ CREATE TEMPORARY TABLES  
☒ SHOW VIEW  
☒ CREATE ROUTINE  
☒ ALTER ROUTINE  
☒ EXECUTE
